Smart Solutions for Smart Enterprises

April 15, 2002

Product Introduction: ACCPAC eTransact

ACCPAC eTransact is a complete Web store solution that integrates closely and easily with ACCPAC end-to-end e-business Solutions. This powerful package provides businesses with powerful business-to-business (B2B) and business-to-consumer (B2C) e-commerce capabilities in a single, robust, and easy-to-use business-to-everyone (B2E) solution.

eTransact makes your e-commerce transition easy by providing out-of-the-box integration with your ACCPAC accounting system, adaptability to the way you do business today, and flexible deployment options. And, of course, eTransact offers all the customization features you expect from a premier Web store solution.

Easily build a Web store that plugs into your ACCPAC accounting solution.

Life Tips

A Problem well stated is a problem half solved.

Take Advantage of a New Web-Based Mailpiece Design Tool

OpenAxis provides a new service that allows you to print postage directly on your mailpieces. You can design envelopes, postcards, and labels with color graphics, logos, pictures, text messages, and rubber stamps: You can print postage for First Class Mail, Postcards, Priority Mail with Delivery Confirmation, or Express Mail: You can even customize multiple layouts and reuse them over and over again. This means you are no longer tethered to a single envelope with your logo or a sticker on it. You can customize different envelopes for different mailings.

Great Advantage

You can take advantage of the following benefits:

Save Time. No more peeling stamps; no more handwriting addresses over and over again. Also no need to stand in line at the Post Office, fill out Delivery Confirmation forms, or buy stamps.

Save Money. No expensive meter leases; no excess stamps; and our address verification reduces costly returned mail. In addition, Electronic Delivery Confirmation is **Free** for Priority Mail and only \$0.12 for Package Services. That is a savings of \$0.38-\$0.40 every package!

Enjoy Faster Delivery. We bar-code your mail so it's automation ready.

Get Your Mail Opened. Award-winning mailpiece design tool makes your mail stand out.

Account for Your Mail. Keep a record of your postage transactions.

Track Your Mail. Our Postage Log lets you track your packages without leaving your desk. No need to keep a receipt or call a hot-line - just click the Status button.

Design as you like:

Is your business judged by the appearance of your mail? Chances are, yes. People judge a book by its cover, and your mail represents you everywhere it goes. Our Internet Postage lets you create professional designs for your mail and print postage directly on it. Furthermore, your envelopes and packages carry more than mail, they carry valuable advertising space. Whether you're building a brand, offering a product, or simply thanking a customer, make sure your message is on the outside of every piece of mail that leaves your door.

Create Label easily:

Our Internet Postage lets you print complete Express Mail labels without filling out any multi-part forms by hand. Just select the destination address; choose your options for signature waiver, weekend, or holiday delivery; then print. Stick the label on your package and it's ready for the mailbox or for pickup by your carrier. You can also check the USPS delivery commitment for the destination of your package, and you can print a receipt for your records. And with the E-mail notification feature, you can let your recipients know you've sent them a package and give them a web-link to track it!

Business Tips: Focusing on Solutions

All companies have management problems or issues in many areas. The problems or issues are needed to develop the company's future. Without the management problems or issues, the company does not have an opportunity to grow to the next stage or cannot accumulate experiences towards a successful future.

Questions are how to successfully tackle management problems or issues. Quite often people try to find out why the management system does not work as expected and point out the persons who have suffered from the system failure. The typical discussions are the following:

“He did not finish his work on time”.

“He does not care about other people's work”.

“The computer network company can not finish their work on time”.

Based on our experiences, we will see better or easier ways to tackle the problems or issues by observing the management system problems or issues and focusing on solutions rather than blaming others. When the management focuses on the management system and solutions, the company can always find easier and less conflicting solutions and get the cooperation among the people involved.

The above management skill requires a strong initiative and leadership to clearly show the company's solutions and direction in the future. The failure of management system is not due to the failure of the workers. It is lack of management leadership and the management should always take the responsibility.

Let's focus on system and solutions.

MS Windows Tips:

Schedule Task

When is the last time you clean up your hard-disk? These maintenance takes long time and it is troublesome. So let's automate it!!

Windows Schedule Task enables you to schedule disk maintenance, such as cleanup, to be done at specific intervals -- to keep your machine running optimally. You can also use it to run numerous other programs at scheduled times that you select.

To use Scheduled Tasks, click **Start**, and point to **Programs/Accessories/System Tools/Scheduled Tasks**. Click **Add Scheduled Task**, and follow the instructions in the wizard.
